

A. Approach

One of the best papers I've ever read.¹ Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua quaerat voluptatem. Ut enim aequi doleamus.

A.1. More details

This is a subsection with details about all of this work. Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua quaerat voluptatem. Ut enim aequi doleamus animo, cum corpore dolemus, fieri tamen permagna accessio potest, si aliquod aeternum et infinitum impendere. Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua quaerat voluptatem. Ut enim aequi doleamus animo, cum corpore dolemus, fieri tamen permagna accessio potest, si aliquod aeternum et infinitum impendere malum nobis opinemur. Quod idem licet transferre in voluptatem, ut postea variari voluptas distinguere possit, augeri amplificarique non possit. At etiam Athenis, ut e patre audiebam facete et urbane Stoicos irridente, statua est in quo.

This can all be seen very clearly in Figure 1. Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua quaerat voluptatem. Ut enim aequi doleamus.

A.1.a. Even more details

This is a sub-subsection. This is **important** to *really* understand what is going on.

Specific Aim 1: Develop a new method to improve the estimate of outcomes in this population.

Critical analytic decision: Represent mortality as a binary variable.

While there are stories of people passing back and forth between this world and the next (e.g. see Orpheus and Euridyce), we have elected to model mortality as a binary outcome. Although this reduces the validity of any measurements related to study participants traveling to and subsequently returning from the underworld, it does reflect a more stable representation for most planned study participants who are real people and not mythical figures.
